Mr. Geo. M. Bacon  
State Engineer  
Salt Lake City, Utah

Dear Sir:

I acknowledge receipt of assessment for Commissioner's expense in connection with the distribution of Sand Wash waters. I should like to have made payment of this on or before the 15th so as not to become delinquent but it is customary to have the directors of the company approve all such bills before payment is made, and since a meeting was appointed for the 16th, I expected to have the bill approved at that time, but due to other matters coming up the meeting has been postponed until the 25th.

The assessment is more than I expected it would be and I am sure the officials will appreciate your furnishing us an itemization of the costs and the amounts each of the other appropriators on the Sand Wash are assessed.

Yours very truly,

Louie Galloway, Secy.
